

## SUMMARY

I am a qualified and professional backend developer with two years of experience in database design and api integration. Strong creative and analytical skills. Team player with an eye for detail.

## EDUCATION

**University of Information Technology**  
2018-2022

## CERTIFICATIONS

- **Backend Development and APIs** - FreeCodeCamp.
- **JavaScript Algorithms and Data Structure** - FreeCodeCamp
- **Frontend Development Libraries** - FreeCodeCamp

## SKILLS

- Solid development with **Nodejs/Golang** on the backend.
- Graph APIs with **NestJs/Express, GraphQL**.
- Knowledge of DBMS: SQL (**MySQL/PostgreSQL**) and NoSQL (**MongoDB**).
- Understanding of front-end technologies including **ReactJS** and **NextJS**.
- Microservices architecture communication by **gRPC**, or messages-based APIs.
- Problem-solving and ability to work independently.
- Strong understanding of web security and best practices (OWASP TOP 10,...)
- Knowledge of the **Agile** Software Development Life Cycle.

## PROFESSIONAL EXPERIENCE

### HRMS - SaaS

Terralogic Inc | 2023 - Present

- Cloud-based HR software serving multiple clients/tenants from a single instance.
- Data isolation, customization, and branding per tenant with logical separation.
- Scalable, automatic updates, simplified maintenance by service provider.

### Help Desk Software

Terralogic Inc. | 2022 - 2023

- Ticketing system for logging, tracking, and managing customer support requests and inquiries.
- Knowledge base for creating, organizing, and sharing self-help resources and documentation.
- Reporting and analytics for monitoring performance metrics, service level agreements (SLAs), and customer satisfaction.

### Time Tracking App

Terralogic Inc. | 2022 - 2023

- Timer controls, task logging, categorization, note-taking.
- Time reports, billable hours tracking, productivity analytics.
- Integrations with project management, invoicing, and productivity tools.

### Ecommerce API

Internship - CyberSoft | 2021 -2022

- A robust back-end system to handle order management, inventory tracking, and payment processing.
- Integration with third-party services like shipping carriers and payment gateways.
